

## Fairytale mud castle

A Romanian couple have built a property of the future and the past, 40km from the city of Sibiu. Their 10-room eco-mansion is constructed from nothing but clay, straw and sand. Built using 100 percent organic materials, the property will soon open as a guesthouse with a restaurant - serving local organic produce from neighbouring farms, no less. The eco-theme runs throughout, with rooms in the winter kept warm using nothing but traditional wood-burning fires. [valeazanelor.ro](http://valeazanelor.ro)

## Urban pastels

The French capital will celebrate contemporary photography this season with Paris Photo and Fotofever Art Fair (11-13 November, at Carrousel du Louvre). At the latter you can see the cloudless skies, pure lines and pastel colours of self-taught French photographer Matthieu Venot. His graphic, abstract and transformative work will be on display at the Artistics booth. [fotofeverartfair.com](http://fotofeverartfair.com)
